

Case Study

CUSTOMER:

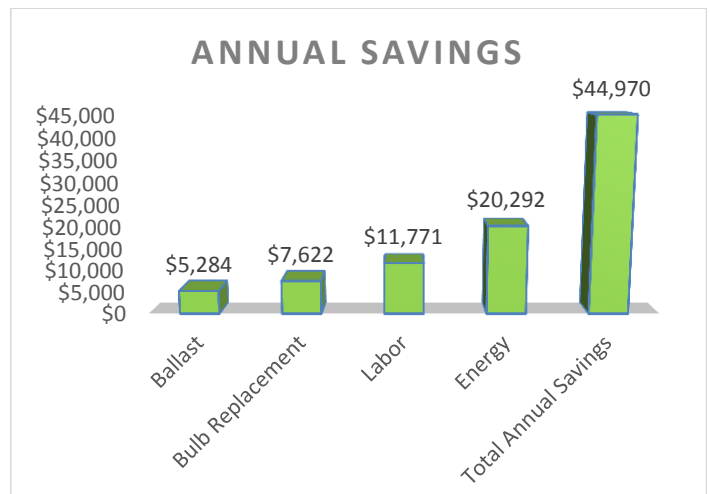

Dick Scott Chrysler Dodge Jeep Ram offers many automotive products and services to the Plymouth area residents and surrounding customers. Their services include trusted Dodge repair and service, original Dodge, Chrysler or Jeep parts and car loans and leases to help their customers purchase the car of their dreams.

NEEDS:

Dick Scott was looking for an energy efficient solution that would reduce their current energy lighting and replacement labor expenses, while improving customer satisfaction and lighting to enhance the appeal of the vehicles for their valuable customers.

SOLUTION:

Kimberly Lighting, LLC replaced the current interior and exterior lighting for Dick Scott. This included on average 30 lamps, 1,000 tubes, 16 high bays, 15 wall packs and 20 parking lot lights with LED. This complete retrofit is reducing their annual kWh usage from 411,900 to 242,801 resulting in \$20,291 in energy savings alone per year! The total savings for the entire project is approximately \$44,970 per year.

Life Savings	Est. Amount
kWh Saved Over Life	1,930,350
CO2 Emissions (lbs)	2,588,599
Acres of Trees Saved	6.31
